Teacher: Mrs. Phillips

Date: January 17, 2012

A Look at Our Week

We will begin working with 3-D shapes.

We are going to learn the months of the year and some holidays/events that happen each month.

The students have been working so hard on reading words and deciding what sound the vowel makes in each word. I have been proud of their efforts!

We are going to read two different stories (both named, The Mitten) and then use a Venn Diagram to compare and contrast the two.

Reminders

*Please send in \$38.00 for our afternoon snack/milk if you haven't already done so.

I would like to have the students bring their 100 items in no later than February 3rd. Edible items will be kept at school unless you state otherwise:)

I am asking that each student decorate a bag or box at home to be used for their Valentine cards. Please send these by the morning of February 14th. Student names are on the back.

Special Notes

Thank you for coming to Culver's Night. It was nice to visit with you a bit. We earned a playground ball for our classroom and I will be able to purchase more items with the money I will receive from working that night. "Scoopie" points are available on kids' meals at Culver's. If you do not save them for your own family; please send them to school. We can use them to purchase items from Culver's.

Our school also saves Box Tops for Education and Campbell's soup labels.

Upcoming

Pennies for Patients will begin the week of February 6th.

An Earthquake drill will be held on February 7th.

We read a book about Martin Luther King, Jr. This usually spurs a lot of questions as the children are unaware of some of the events that led up to Mr. King's search for equality.
